The Supra is the most evolved concentrator in its category. It’s the first model which can work either in series or in parallel. To add, the Supra is the first concentrator to exploit the principle of the booster pump which improve greatly the concentration rate without increasing the energy consumption. This principle is inspired by a long industrial expertise in reverse osmosis.

**The Solution for Large Sugarbush**

**15 000 Taps+!**

From 1 600 to 4 800 Gal. / hr.

Concentration up to 27° Brix

- Easy to operate
- Complete redundancy, (2 machines in one) you’ll never be a in tight spot
- Custom conception to meet your expectations
- Membrane industry know-how developed for international market applied to maple industry
- Available in 240V 1 phase or 208V 3 phases
- Parallel cleaning
- Production in series or in parallel

**Performance – Productivity - Simplicity**

- PFH-SUPRA-9-2-G-1
